Building a Family Support Partner Program:

Tools and Tips for Agency Readiness and Hiring
State Commitment to System of Care and High Fidelity Wraparound

- The Department of Behavioral Health and Developmental Services was awarded a 4 year federal grant in 2012: SAMHSA System of Care Implementation Grant

- Primary approach for developing Systems of Care (SOC) statewide is through implementation of Intensive Care Coordination using the High Fidelity Wraparound (HFW) process
Components of the SOC Grant

• Established the Wraparound Center of Excellence at the Office of Comprehensive Services

• Supports the Virginia Family Network including the establishment of Youth Move Virginia

• Five sub-contracts to organizations to implement Intensive Care Coordination through HFW including the Family Support Partner role
History of Family Support in VA

Where does Virginia fall?

Family Driven
Families have a primary decision making role in the care of their own children as well as the policies and procedures governing care for all children.

Family Engagement
The community has an active effort underway at some level to engage families in parts of the system of care. Overall impact that families have on the system, plans, and implementation is not yet significant.

Family Involvement
Families are included or participate in some parts of the system; although only in positions considered to be traditional or “safe”. Family involvement at this level is not in significant places, positions, or numbers.

Unwavering champions for children and families.
