INTRODUCTION

Within the highly complex research base on “what works” in behavioral health services for children, youth, and families, one finding is clear and consistent: Outcomes are highly dependent on program and system factors. How well services facilitate improvements in youth and family functioning, school success, the ability to live and thrive in the community, and the realization of hopes and dreams is highly dependent on how well the programs implementing these services function, and the degree to which the service system as a whole is set up for success.

The “organizational and system context” affects outcomes for youth and families through a variety of pathways. One primary mechanism is through its impact on implementation quality and fidelity. Implementation of a practice model or evidence-based practice is highly dependent on system and program factors, such as adequacy and appropriateness of funding; caseloads; attention to workforce development (such as hiring, training, and developing skills of staff); system policies; and other factors. If such factors are not in alignment—and the strategy or practice model cannot be implemented as intended—outcomes suffer greatly. The impact of system factors on Wraparound implementation has been found in several studies (Bruns, Suter, & Leverentz-Brady, 2008; Bruns, Suter, & Leverentz-Brady, 2006). Even more important, several studies (Browne, Puente-Duran, Shlonsky, Thabane, & Verticchio, 2016; Bruns, Pullmann, Sather, Brinson, & Ramey, 2014) have also shown how poorly supported and implemented Wraparound can yield outcomes that are no better than “services as usual” (see Bruns, 2015, for a full discussion of this research and topic).

Organizational and system context has also been shown to directly affect outcomes. As has been made clear in groundbreaking research by Charles Glisson and his colleagues (2002; 1998; 2005) in behavioral health (as well as many other research teams studying medical services, business, and industry), the climate and culture of child-serving systems and programs directly affects their effectiveness in actually helping youth and families. Leadership, staff morale, supervision quality, and other factors all seem to directly impact the outcomes experienced by clients. The reasons for this direct link to outcomes are not always clear, but likely have to do with how well workers who have difficult and complex jobs (such as Wraparound care coordinators or child welfare case workers) are able to cope with and problem solve in the face of stressful situations. As Glisson and Hemmelgarn (1998, p. 404) put it in their influential paper on this topic, “the levels of conflict, role clarity, job satisfaction, cooperation, and other variables that characterize the climate of work environments [are] powerful determinants of how these workers respond to unexpected problems, the tenacity with which difficult problems are solved, and the affective tone of their work-related interactions with children and families.”

In sum, we must use evidence-supported service models in our systems of care. Examples include evidence-based practices when we provide clinical care and the Wraparound process for providing care coordination with youth with complex needs. However, such models must be delivered with quality and fidelity if they are to produce positive effects. Quality and fidelity, in turn, depend on the degree to which organizational routines and structures support full and robust implementation, the degree to which systems are hospitable to the programs, and the degree to which service providers feel supported to problem solve and “dig in” under stressful working conditions.

THE CURRENT DOCUMENT

How can we best ensure hospitable systems and supportive organizational conditions for Wraparound? Because implementing Wraparound and systems of care is such a complicated endeavor, one mechanism is to provide guidance to child and family advocates and system leaders about what factors need to be attended to across all the levels described above.

Since its inception in 2004, the National Wraparound Initiative (NWI) has provided the field with resources and guidance that facilitate high quality and consistent Wraparound implementation that can also serve as the basis for evaluation and quality improvement. The current resource is the latest in this ever-evolving set of supports for the field of Wraparound and systems of care. It takes prior work by the NWI (described below) to a level of greater specificity, by providing a summary of research-, theory-, and practice-based standards to be attended to across
five implementation-related areas (staff, leadership, organization, accountability, and system) and two output-related areas (fidelity and outcomes).

This work aligns with and builds on prior products from the NWI, such as Walker, Koroloff, & Schutte’s Necessary Support Conditions (2003), and the Implementation Guide to Wraparound, available on the NWI website (http://nwi.pdx.edu/Wraparound-implementation-guide/). However, given the continuing challenge of supporting Wraparound implementation, we have developed this document as a method of translating the guidance provided by prior resources into more concrete statements and measurable indicators of success. We have also expanded the focal areas to reflect the expansion of research and knowledge in both Wraparound and implementation science.

Finally, as discussed in the sections to follow, we have formatted the standards proposed herein to facilitate the NWI’s continued production of supportive resources on this topic, including self-assessment tools that can ensure the standards can be used as the basis for evaluation and quality assurance, so Wraparound implementing states and initiatives can keep themselves on track, so that Wraparound can fully live up to its promise for enrolled youth and families.

**DEVELOPMENT PROCESS**

These Wraparound Implementation and Practice Quality Standards are grounded in a strong foundation of implementation science research and based on the best available research evidence, coupled with consensus from national Wraparound experts. The guidance is in line with National Wraparound Implementation Center (NWIC) training and implementation support materials. The authors undertook the following activities in the process of developing the standards:

- A review of the literature on implementation science and workforce development, relying heavily on a synthesized framework developed by the National Implementation Research Network (NIRN)
- A review of existing Wraparound practice and implementation guidance and support materials, especially those published by the NWI
- A review of existing Wraparound effectiveness research
- A review of existing Wraparound fidelity measurement tools and common outcome measures
- Consultation with leaders of NWI and NWIC, including national Wraparound trainers, system developers, evaluators, and researchers

What emerged from this process were **seven clear areas that need to be attended to while developing and implementing Wraparound services**. These include five implementation-related areas:

Four at the Wraparound provider-level:
1. Competent Staff
2. Effective Leadership
3. Facilitative Organizational Support
4. Utility-focused Accountability Mechanisms

One at the wider-community-level:
5. Hospitable System Conditions

And two output-related areas:
6. Fidelity: High-Quality Wraparound Practice
7. Outcomes: Improved Youth and Family Functioning

While high quality Wraparound services provided to appropriate service recipients (aka, “fidelity”) can produce positive outcomes (Bruns, Suter, Force, & Burchard, 2005; Rast, Peterson, Earnest, & Mears, 2003), programs that only focus on fidelity and outcomes miss the opportunity to boost and sustain efforts to improve Wraparound
fidelity by fostering organizational and system conditions known to support the high-quality implementation of Wraparound (Bruns et al., 2006; Effland, Walton, & McIntyre, 2011; Snyder, Lawrence, & Dodge, 2012). Below we summarize the basis for each of the areas.

**ORGANIZATIONAL-LEVEL STANDARDS**

The National Implementation Research Network’s (NIRN) Implementation Drivers Framework (Fixsen, Naoom, Blase, Friedman, & Wallace, 2005) provides an accessible and concise roadmap for the organizational-level drivers of high-quality implementation of client-service models like Wraparound:

1. **Competency Drivers** are mechanisms to develop, improve, and sustain one’s ability to implement an intervention as intended in order to benefit youth, families, and communities.
   a. *Recruitment and Selection of Staff*: specification of required skills and abilities with the pool of candidates; methods for recruiting likely candidates that possess these skills and abilities; protocols for interviewing candidates, and; criteria for selecting practitioners with those skills and abilities.
   b. *Training*: provide knowledge related to the history, theory, philosophy, and values of the model and organization; introduce the components and rationales of key practices, and; provide opportunities to practice new skills to criterion and receive feedback in a safe and supportive training environment.
   c. *Coaching*: an effective coach provides “craft” information along with advice, encouragement, and opportunities to practice and use skills specific to the innovation.
   d. *Performance Assessment (Staff Fidelity)*: designed to assess the use and outcomes of the skills that are reflected in the selection criteria, taught in training, and reinforced and expanded in coaching processes.

2. **Organization Drivers** are mechanisms to create and sustain hospitable organizational and system environments for effective services.
   a. *Systems Intervention*: strategies for leaders and staff within an organization to work with external systems to ensure the availability of the financial, organizational, and human resources required to support the work of the practitioners.
   b. *Facilitative Administrative Supports*: careful attention given to policies, procedures, structures, culture, and climate to assure alignment of these aspects of an organization with the needs of practitioners.
   c. *Decision Support Data Systems*: making use of a variety of measures to assess key aspects of the overall performance of an organization; provide data to support decision making, and; assure continuing implementation of the evidence-based intervention and benefits to children and families over time.

3. The **Leadership Driver** focuses on providing the right leadership strategies for the type of leadership challenges. These leadership challenges often emerge as part of the change management process needed to make decisions, provide guidance, and support organization functioning...Leadership needs change as implementation progresses—“adaptive leadership” styles are needed to “champion change” in the beginning; more technical leadership styles are needed to manage the continuing implementation supports (e.g., selection interviews, performance assessments, system interventions) for effective organizations over the long run.

All of these drivers should be integrated and compensatory to ensure they connect together in a logical and efficient way that allows for a balance between implementation strengths and weaknesses over time. For example, results from staff performance assessments should be fed back to supervisors and coaches to enhance training and

---

1 Implementation driver descriptions taken directly from Fixsen, Blase, Naoom, and Duda (2015). See also: http://nirn.fpg.unc.edu/learn-implementation/implementation-drivers
coaching activities, and information gleaned from decision support data systems should be used to inform targeted system interventions to remove barriers from improved organizational performance.

COMMUNITY AND SYSTEM-LEVEL STANDARDS

Although many of the above issues are controlled by the Wraparound provider organization, given the integrated nature of the Wraparound model, community and system conditions have considerable influence on the program (including staff competency, organizational climate, and leadership), program fidelity, and youth and family outcomes. Fiscal and policy decisions by leaders at multiple levels (including the federal level) can substantively affect the degree to which Wraparound initiatives are run. Providing comprehensive care through the Wraparound process also requires a high degree of collaboration and coordination among child- and family-serving agencies as well as community organizations. These agencies and organizations need to work together to provide access to flexible resources and a well-developed array of services and supports in the community. Walker and her colleagues (2003; 2011) have defined these essential community and system supports for Wraparound, and organized them by six themes, which we have integrated into the standards we set forth in this document:

- **Community partnership**: Representatives of key stakeholder groups, including families, young people, agencies, providers, and community representatives have joined together in a collaborative effort to plan, implement and oversee Wraparound as a community process.

- **Collaborative action**: Stakeholders involved in the Wraparound effort work together to take steps to translate the Wraparound philosophy into concrete policies, practices and achievements that work across systems.

- **Fiscal policies and sustainability**: The community has developed fiscal strategies to support and sustain Wraparound and to better meet the needs of children and youth participating in Wraparound.

- **Access to needed supports and services**: The community has developed mechanisms for ensuring access to the Wraparound process as well as to the services and supports that Wraparound teams need to fully implement their plans.

- **Human resource development and support**: The system supports Wraparound staff and partner agency staff to fully implement the Wraparound model and to provide relevant and transparent information to families and their extended networks about effective participation in Wraparound.

- **Accountability**: The community implements mechanisms to monitor Wraparound fidelity, service quality, and outcomes, and to oversee the quality and development of the overall Wraparound effort.

FIDELITY STANDARDS AND OUTCOMES

As described in the introduction, the purpose of this document is to provide needed clarity on system and organizational standards that are likely to impact quality of Wraparound implementation, and thus meaningfully affect the experience of enrolled youth and families. Because elucidating program and system standards for Wraparound is intended first and foremost to promote fidelity and outcomes, this document also provides indicators of adherence to the Wraparound practice model, as well as the most common outcomes Wraparound initiatives strive to achieve, based on the Wraparound theory of change and the ever-evolving work of the community of practice that is the NWI.

Since 2004, the NWI has aimed to provide clarity on what represents quality and fidelity in Wraparound implementation, building on research on “what works,” as well as the experiences of many Wraparound pioneers and experts that preceded the establishment of the NWI. The fidelity areas listed here are a distillation of many iterations of work to define the Wraparound principles and practice model, and, in turn, measures of implementation quality and fidelity, such as the measures of the Wraparound Fidelity Assessment System (WFAS). More recently, training curricula and coaching tools used by the NWIC, such as the Coaching Measure for Effective Teamwork (COMET) have further distilled the essential process components of Wraparound.
The fidelity standards presented in this document reflect the above efforts, and are aligned with the training and coaching model used by the NWIC. Meanwhile, the core outcome areas presented here reflect Wraparound’s longstanding emphases of (1) ensuring youth are “in school, at home, and out of trouble,” (2) prioritizing youth and families’ perspectives on the degree to which the process is meeting their individualized needs, and (3) providing holistic care that improves the skills and confidence of youth and caregivers alike.

**AN IMPLEMENTATION FRAMEWORK FOR WRAPAROUND CARE COORDINATION**

Figure 1, below, visually synthesizes the key implementation frameworks that undergird the seven standards areas.
Outcomes: Improved Youth and Family Functioning

Fidelity: High-quality Wraparound Practice

Effective Leadership

Provider-level Implementation Drivers

Competent Staff

Facilitative Administration

Utility-focused Accountability Mechanisms

Decision Support Data Systems

Community Partnership & Collaborative Action

Fiscal Policies & Sustainability

Access to Needed Supports & Services

Human Resource Development & Support

Accountability

Community and System Conditions based on Community Supports for Wraparound Inventory © National Wraparound Initiative, 2008
Ultimately, the goal of any Initiative should be to meet or surpass all of the standards outlined in this document—so positive outcomes, consistently high fidelity, as well as a strong system support, and well-developed and balanced organizational-level implementation drivers. Balanced attention to the core implementation drivers within a hospitable system context should lead to sustainable program fidelity and positive youth and family outcomes.

**POTENTIAL USES**

The Wraparound Implementation and Practice Quality Standards are intended for use by Wraparound provider organizations and their funders for a variety of uses, not limited to:

- Guiding a self-assessment of Wraparound program quality
- Providing structure to a Wraparound program planning process
- Assisting in choosing data elements to incorporate into a continuous quality improvement program
- Informing performance-based contracting

The standards are based on expert consensus regarding best practice, *not modal program performance*. Therefore, if they are to be used for something more than internal monitoring and quality improvement (such as contracting or outlining binding performance expectations), we strongly recommend collecting representative local data to assess baseline performance before determining local targets and expectations, while also seeking ways to help organization meet the standards contained in this document.

**NEXT STEPS**

In the coming year the NWI plans to develop self-assessment tools and processes to support the use of the standards in the ways outlined above. This will include online survey tools, meeting scripts, and accompanying resources. Additionally, the NWI and their partners hope to use these quality standards for further research into how organizational and system context impacts youth and family outcomes.
GLOSSARY

It takes an entire community to implement and sustain high-quality Wraparound. While there are myriad successful system structures and terms for participating entities, the standards have to have consistent and clear terminology to distinguish between different groups of community members and professionals. Therefore, the standards use following terms:

**Caregiver(s):** The person(s) primarily responsible for supervising the youth and meeting their basic needs. Often, but not always, a biological parent or relative. Typically, the caregiver(s) and youth live in the same residence.

**Community support:** an organization within the youth’s physical or cultural community that provides programming capable of increasing a youth or family member’s social ties and/or improving their functioning. Examples include: parks and recreation programs, volunteer mentoring programs, religious services, affinity groups, etc.

**Care Coordinator:** the professional primarily in charge of facilitating team meetings, coordinating the family’s service plan, and generally moving the Wraparound process forward. Other local terms for this position may include a “facilitator” or “intensive case manager.”

**Formal Services:** Services provided by a professional paid to work directly with a youth or family member. Examples include: Wraparound, therapy or counseling, educational services, parent training, probation, medical treatment, etc.

**Natural support:** an individual within a youth or family’s social network that provides consistent and/or meaningful support above and beyond any formal organizational ties and without remuneration. Examples include: relatives, friends, neighbors, clergy, business owners, etc.

**Supervisor:** the person directly responsible for supervising care coordinators.

**Wider organizational leadership:** higher-level administrators within a Wraparound provider organization, such as a program or division director, an Executive Director or CEO, etc., who manage and oversee administrative details, such as human resources, strategic decision making, community outreach, etc.; the people that make up the hierarchy above the supervisor.

**Wraparound initiative:** the collective momentum and activities undertaken by a wide variety of stakeholders to develop, strengthen, and oversee a System of Care and the implementation of the Wraparound model within their community. The work of this entity is often executed within a formal collaborative structure, sometimes called a “Community Team.” An Initiative may have multiple Wraparound provider organizations. The Wraparound initiative is the focal point of the standards in the System Support Domain.

**Wraparound provider organization:** the entity responsible for hiring and overseeing Wraparound care coordinators. A single organization is the focal point of the standards in the Implementation Domain.

**Youth and family:** the constellation of people, including a youth and their caregiver(s), that present and engage in Wraparound. This could include siblings, extended family members, etc.

**Youth:** person whose problematic behaviors warranted enrollment in Wraparound; may also be referred to as the child, adolescent, young adult, etc.
**IMPLEMENATION AREA 1: COMPETENT STAFF**

<table>
<thead>
<tr>
<th>Indicator</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>1A Stable Workforce</td>
<td>Care Coordinator turnover is reasonably low (less than 25% a year) and the average tenure of the program’s supervisor(s) is 2 or more years or since the program began.</td>
</tr>
<tr>
<td>1B Qualified Personnel</td>
<td>Wraparound care coordinators and supervisors have relevant and appropriate experiences and attributes to carry out their job responsibilities. Care Coordinators have prior experience working with youth with complex behavioral health needs, and are strengths-based, flexible, creative, and can ally with youth and their caregivers while building positive relationships that extend beyond families. Supervisors possess strong conflict resolution and facilitation and leadership skills, and have a deep understanding of Wraparound, preferably with prior experience as a care coordinator.</td>
</tr>
<tr>
<td>1C Rigorous Hiring Processes</td>
<td>The Wraparound provider organization has high quality written job descriptions and interviewing and hiring protocols for each of the relevant positions. Job descriptions reflect best practices and state of the art knowledge about Wraparound skills and expertise, and have clear expectations for performance. Interview and selection protocols include behavioral questions or direct observation of tasks, and require a writing exercise or sample.</td>
</tr>
<tr>
<td>1D Effective Training</td>
<td>Wraparound care coordinators and supervisors are required to attend initial and booster trainings relevant to carrying out their job responsibilities. There is a written training protocol outlining the timing of required trainings, and staff are oriented to the requirements upon hiring. Training attendance is tracked.</td>
</tr>
<tr>
<td>1E Initial Apprenticeship</td>
<td>Before taking on a full caseload, care coordinators go through a minimum 30-day “apprenticeship” during which time they shadow a more experienced care coordinator or coach and practice under observation with feedback until they demonstrate enough competence (via objective measures in multiple settings) to practice on their own.</td>
</tr>
<tr>
<td>1F Ongoing Skills-based Coaching</td>
<td>Care Coordinators have at least bi-weekly contact with a coach or a supervisor who serves as a coach. Coaching activities are integrated into practice and aimed at improving the staff’s skills in working with youth and caregivers. Coaching includes at least quarterly formal assessment of practice in multiple settings via observations, recordings, and/or review of documentation.</td>
</tr>
<tr>
<td>1G Meaningful Performance Assessments</td>
<td>Care Coordinators’ performance is assessed at least every six months using objective measures (e.g., observations, fidelity measures, etc.) that are tied to their job descriptions and quality indicators. The information is used to shape skill development, such as serving as a basis for certification, and to facilitate coaching. Assessment is viewed by staff as a proactive component of skill development, and not seen as punitive.</td>
</tr>
</tbody>
</table>

---

2 We chose to focus specifically on Wraparound care coordinators and supervisors because they are the minimum personnel necessary to provide Wraparound services. However, we recognize that there may be other individuals in key Wraparound roles (e.g., therapists, behavioral support providers, respite workers, mentors, etc.) within a particular organization or initiative; we encourage users of the Standards to think about what type of workforce development expectations may be relevant to these other professionals.
## IMPLEMENTATION AREA 2: EFFECTIVE LEADERSHIP

</table>
| 3E | Routine Oversight of Key Organizational Operations | There are individuals responsible for each of the following at the Wraparound provider organization:
1) overseeing human resources (staff recruitment, selection, training, coaching, performance assessment, and retention),
2) collecting/compiling, analyzing, and communicating data related to Wraparound fidelity, youth and caregiver satisfaction and outcomes, and service costs,
3) overseeing Wraparound implementation and sustainability, and
4) advocating for necessary system-level change.

These people have relevant and appropriate experience and training to carry out their job responsibilities, and adequate time to fulfill them.
## Implementation Area 4: Utility-Focused Accountability Mechanisms

<table>
<thead>
<tr>
<th>Indicator</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>4A</td>
<td><strong>Effective Data Management</strong> The Wraparound provider organization uses a client information database that serves as the youth and family's primary record; all relevant team members, including those external to the organization, have access to relevant information. The system generates reports that are routinely used to facilitate and monitor effective team process, supervision, and program management.</td>
</tr>
<tr>
<td>4B</td>
<td><strong>Purposeful Training &amp; Coaching Evaluation</strong> The Wraparound provider organization routinely evaluates trainings, and the information is used to improve training content and policies. In addition, coaching activities are routinely evaluated via a formal assessment of practice using a standardized data collection tool. There is a feedback mechanism to improve staff and coach performance based on the formal assessments. If the training and/or coaching and their evaluations/assessments are done by an external party, data is still reviewed by the Wraparound provider organization to inform decision making.</td>
</tr>
<tr>
<td>4C</td>
<td><strong>Routine Fidelity Monitoring</strong> The Wraparound provider organization routinely and reliably measures fidelity to the Wraparound model. This information is analyzed and shared with relevant stakeholders (staff, administrators, families, payers, etc.). Even if collected by an external party, fidelity data are clearly built into internal practice routines within the Wraparound provider organization, and there are strong feedback loops that are used to enact program improvements.</td>
</tr>
<tr>
<td>4D</td>
<td><strong>Routine Outcomes Monitoring</strong> Youth and family satisfaction and outcomes, as well as service costs and savings, are routinely and reliably measured by the Wraparound provider organization. This information is analyzed and shared with relevant stakeholders (staff, administrators, families, payers, etc.). Even if collected by an external party, outcome and cost data are clearly built into internal practice routines within the Wraparound provider organization, and there are strong feedback loops that are used to enact program improvements.</td>
</tr>
</tbody>
</table>
### IMPLEMENTATION AREA 5: ACCESSIBLE SYSTEM CONDITIONS

<table>
<thead>
<tr>
<th>Indicator</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>5A Appropriate Wraparound Population</td>
<td>Youth eligible for and enrolled in Wraparound are at risk for out-of-home placement or are among those with the most complex needs in the community. For example: 75% of more of the youth engaged in Wraparound were transitioning home from or at imminent risk of an out-of-home placement at the time of referral; 90% of more of the youth engaged in Wraparound have two or more Axis 1 diagnoses, multi-system/agency involvement, multiple actionable items on an assessment such as the CANS, and/or three or more adverse life events or traumas.</td>
</tr>
<tr>
<td>5B Empowered Community Leadership and Support</td>
<td>There is community leadership for the Wraparound initiative in the form of a formal collaborative structure that includes empowered leaders from child serving systems and community agencies. Relevant child serving agencies (e.g., mental health, child welfare, juvenile justice, schools, and courts) participate actively and “buy in” to the Wraparound initiative.</td>
</tr>
<tr>
<td>5C Active Caregiver and Youth Leadership</td>
<td>Family and youth are influential members of decision-making entities within the Wraparound initiative and take active roles in Wraparound planning, oversight, and evaluation.</td>
</tr>
<tr>
<td>5D Implementing a Single Plan of Care</td>
<td>Stakeholders within the Wraparound initiative recognize that a Wraparound plan of care structures and coordinates the work of all partner agencies and providers on behalf of a given youth and family. Staff from agencies in the community respect and work from a single Wraparound plan when working with Wraparound-enrolled youth and families.</td>
</tr>
<tr>
<td>5E Collaborative Action</td>
<td>Stakeholders within the Wraparound initiative take specific steps to translate the Wraparound philosophy into concrete policies, practices, and achievements, such as statements of principles and mission, clear population of focus and eligibility requirements, a strategic plan, and Memoranda of Understanding (MOUs). Agency staff are informed of Wraparound principles and practice and participate actively and productively on teams.</td>
</tr>
<tr>
<td>5F Sustainable Fiscal Policies</td>
<td>The Wraparound initiative has developed fiscal strategies to meet the needs of children participating in Wraparound and methods to collect and use data on expenditures for Wraparound-eligible children. Funds are available to pay for services and supports and to fully implement strategies needed to meet needs.</td>
</tr>
<tr>
<td>5G Adequate and Appropriate Wraparound Access</td>
<td>Wraparound is adequately publicized, available, and accessible so that the youth and families who would benefit are able to participate if they wish. There is a single entry point or other convenient way for high-needs youth to be screened for and referred to Wraparound. The Wraparound initiative or provider organization has written Wraparound eligibility rules that focus on youth with the most complex needs who are at risk for out-of-community placement, regardless of type of system involvement.</td>
</tr>
<tr>
<td>5H Robust Array of Supports and Services</td>
<td>Wraparound-enrolled youth and families have access to a full array of services and supports that Wraparound teams need to fully implement their plans and meet the youth’s and families' needs, including, but not limited to, intensive in-home services, mentoring, respite, family and youth peer support, and mobile crisis response and stabilization. Evidence-based clinical treatments and therapies for major clinical needs are readily available.</td>
</tr>
<tr>
<td>5I System Accountability</td>
<td>The Wraparound initiative has implemented mechanisms to monitor Wraparound fidelity, service quality, and outcomes, and to assess the quality and development of the overall Wraparound initiative.</td>
</tr>
<tr>
<td>Indicator</td>
<td>Definition</td>
</tr>
<tr>
<td>-----------</td>
<td>------------</td>
</tr>
<tr>
<td><strong>F1</strong></td>
<td><strong>Timely Engagement and Planning</strong>&lt;br&gt; Youth and families are engaged in Wraparound services within 10 days of a referral and develop their initial Wraparound plan within 30 days of being engaged. Then, teams meet regularly (at least every 30-45 days) to review and modify the plan of care as needed.</td>
</tr>
<tr>
<td><strong>F2</strong></td>
<td><strong>Outcomes-based Process</strong>&lt;br&gt; Success of the Wraparound plan—including progress toward meeting needs, strategy implementation, and task completion—is measured objectively, reviewed routinely, and used to inform changes to the plan as needed. Needs statements are linked to measurable outcomes and data from standardized instruments are integrated into the planning process where possible.</td>
</tr>
<tr>
<td><strong>F3</strong></td>
<td><strong>Effective Teamwork</strong>&lt;br&gt; Diverse teams consisting of formal and natural supports work together to develop, implement, and monitor individualized service plans that meet the unique needs of the youth and family. All team members take ownership over their assigned tasks and work together to meet the youth's and family's needs.</td>
</tr>
<tr>
<td><strong>F4</strong></td>
<td><strong>Use of Natural/Community Supports</strong>&lt;br&gt; Natural supports are integral team members. Involvement in Wraparound strengthens the support received by youth and families from natural and community supports. When possible, strategies in the plan are undertaken by natural supports within the youth's and family's community.</td>
</tr>
<tr>
<td><strong>F5</strong></td>
<td><strong>Based on Needs</strong>&lt;br&gt; Services and supports are focused on addressing the high-priority underlying needs of the youth, as well as their family members. Needs statements refer to the underlying reasons why problematic situations or behaviors are occurring, not simply stated as deficits, problematic behaviors, or service needs. The Wraparound process continues until needs are sufficiently met.</td>
</tr>
<tr>
<td><strong>F6</strong></td>
<td><strong>Driven by Strengths</strong>&lt;br&gt; Functional strengths of the youth, family, all team members, and the family’s community are collectively reviewed and utilized when developing and choosing strategies. Identified strengths are functional in nature, and describe how the individual successfully copes with challenging situations. Team members avoid blaming and remain focused on solutions, rather than dwelling on negative events.</td>
</tr>
<tr>
<td><strong>F7</strong></td>
<td><strong>Determined by Families</strong>&lt;br&gt; The youth’s and family’s culture, capabilities, interests, and skills are elicited, fully understood, and celebrated. They are viewed as critical to a successful Wraparound process and are the basis for decision making and creative problem solving. The youth’s and family’s perspective is prioritized in developing and modifying the mix of strategies and supports to assure the best fit with their preferences.</td>
</tr>
<tr>
<td><strong>F8</strong></td>
<td><strong>Planned for Transitions and Follow-Up</strong>&lt;br&gt; Transitions are planned for in advance and celebrated with full youth and family participation. Transitions only happen when the youth and family have sufficiently met their needs, not due to an adverse event or an administrative requirement. In addition, the Wraparound provider organization follows up with youth and families 3-6 months after transition to ensure improvements have been maintained and that the youth is stable and the family is adequately supported.</td>
